

Job Interview

Abril García Bustos

Alejandro Hernández Díaz

Interview:

Good morning and welcome.

You:

Good morning! Thank you for having me. I'm excited to be here for the interview.

Interview:

I'd like to ask you a few questions. Let's start with education. What were your grades during your academic years?

You:

Throughout my academic years, I maintained high grades, particularly excelling in subjects related to computer science and software engineering. I have a strong academic background that has equipped me with the necessary skills for software development.

Interview:

Great. And what have been your experiences in this field?

You:

I have several years of experience working as a software developer. In my previous roles, I've been involved in full-stack development, collaborating with cross-functional teams to design, develop, and deploy software solutions. I have expertise in multiple programming languages and frameworks, as well as experience with agile methodologies and version control systems.

Interview:

Can you tell me about your computer? What specifications does it have?

You:

Certainly! My computer is equipped with an AMD Ryzen 9 processor, 32GB of RAM, and a 1TB NVMe solid-state drive (SSD) for storage. It also has a dedicated graphics card, an NVIDIA GeForce RTX 3070, which supports GPU-accelerated tasks like machine learning and rendering. It runs on the latest version of Ubuntu Linux, providing a stable and efficient development environment.

Interview:

That's great. Now, you can speak good English, but can you speak any other languages?

You:

Yes, I'm proficient in Spanish. Besides English and Spanish, I also have expertise in various programming languages and technologies essential for software development.

Interview:

I see. Now, one last question. Why do you want this vacancy?

You:

I am deeply passionate about software development and enjoy the process of creating innovative solutions to complex problems. The opportunity to work as a software developer in your company excites me because it would allow me to leverage my skills and experience to contribute to the development of cutting-edge software products. I am eager to collaborate with talented individuals and make a meaningful impact on the company's success.

Interview:

Okay, that's all for now. Thank you for coming. We'll contact you soon.

You:

Thank you very much.
